Project Proposal

Anthony Berg

February 6, 2024

1 Context

1.1 Introduction

- US Airways Flight 1549 had two interesting points in the investigation https://en.wikipedia.org/wiki/US_Airways_Flight_1549

    1. Checklist in the QRH for ditching was in a poor order, i.e. ditch button was one of the last options

    2. NTSB tried to use simulators, where they tested the simulator with immediate reactions - which were deemed us unrealistic

- Reasons for project

    - Order is important, especially for time sensitive situations
    - Seeing what the action of forgetting a step could result in - Checklist Manifesto intro

1.2 Key Background Sources

Resource	Info
This needs to be fixed as it will overflow	Description: Filler Reason: Filler

2 Aim and Objectives

3 Planning

3.1 Diagrammatic Work Plan

3.2 Brief Explanation

3.3 Risks

4 Ethics

4.1 Ethics Checklist

My project:

1. Will *not* involve working with **animals** or users/staff/premises of the **NHS**

2. Will be carried out **within the UK or European Economic Area**

3. Will *not* have any impact on the **environment**

4. Will *not* work with populations who do *not* have **capacity to consent**

5. Will *not* involve work with **human tissues**

6. Will *not* involve work with **vulnerable groups** (Children/Learning disabled/Mental health issues, etc.)
