1 Context

1.1 Introduction

- US Airways Flight 1549 had two interesting points in the investigation https://en.wikipedia.org/wiki/US_Airways_Flight_1549
 1. Checklist in the QRH for ditching was in a poor order, i.e. ditch button was one of the last options
 2. NTSB tried to use simulators, where they tested the simulator with immediate reactions - which were deemed as unrealistic
- Reasons for project
 - Order is important, especially for time sensitive situations
 - Seeing what the action of forgetting a step could result in - Checklist Manifesto intro

1.2 Key Background Sources

2 Aim and Objectives

3 Planning

3.1 Diagrammatic Work Plan

3.2 Brief Explanation

3.3 Risks

4 Ethics
